Since 1990, Vidur has been performing extensively all over India and abroad. He has taken his music beyond a performance art, and explored its psychological and spiritual realms to great depth. In this unique lecture demonstration, Vidur will talk about different aspects of Hindustani Classical Sitar like its history, its place in the ancient, medieval, and modern society, its role in the artistic, the spiritual, as well as the corporate world, and much more. Through some insightful video presentations, we will learn more about the world of Sitar and Sitar Makers of India. The program will be concluded with a live Sitar performance by Vidur.
